

CRYPTINFO

INTRODUCTION-

A **cryptocurrency** (or **crypto currency**) is a digital asset designed to work as a medium of exchange that uses strong cryptography to secure financial transactions, control the creation of additional units, and verify the transfer of Cryptocurrencies use decentralized control as opposed to centralized digital currency and central banking systems.

The decentralized control of each cryptocurrency works through distributed ledger technology, typically a blockchain, that serves as a public financial transaction database.

Bitcoin, first released as open-source software in 2009, is generally considered the first decentralized cryptocurrency^{Since the release of bitcoin, over 6,000} *altcoins* (alternative variants of bitcoin, or other cryptocurrencies) have been created.

PROBLEM STATEMENT-

The problem we are aiming to solve is the one which comes directly for the cryptocurrency holders which was to know its price and stock value regarding it

Objectives-

- To give user one site to view prices of various cryptocurrency
- To provide user with a user friendly website
- To provide user with the latest new with the data
- To provide user knowledge about market assets

Source of data-

We are using api of different site so as to give user maximum benefits while surfing our website and providing different feature to it so as to maximise the user experience
